Assignment 05A External CSS file linked to HTML file

Assignment 05B Internal CSS codes inside HTML file

Understand how to apply external and internal CSS codes and the operations of the CSS Designer Panel.

01. Learning Tools

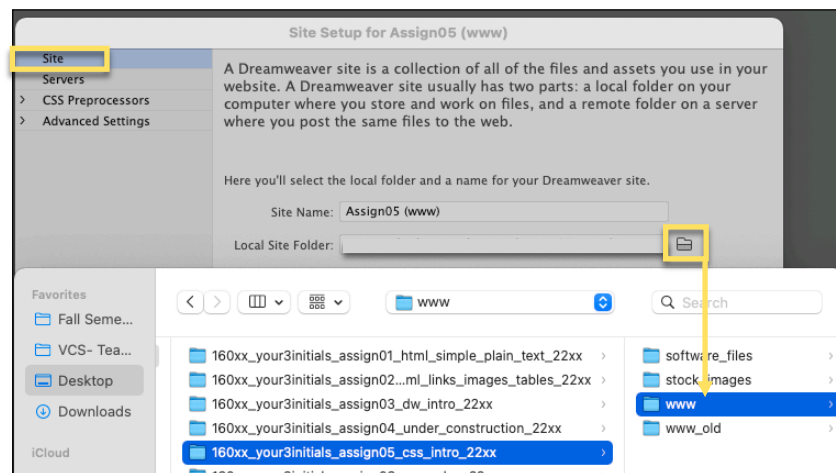

- Textbook: prior reading assignments
- MyCourses > assign00_File Naming Protocol.pdf
- MyCourses > HTML Codes.pdf
- MyCourses > Set-Up Dreamweaver.pdf
- Practice with codes: https://www.w3schools.com/html/html_examples.asp
- MyCourses > CSS Introduced.pdf
- Practice with codes: https://www.w3schools.com/css/css_examples.asp

02. Properly store .css, .html, .jpg, .gif files in their appropriate sub-folder within the parent folder: 160xx_your3initials_assign05_css_intro_22xx

03. Set-up “Manage Site” or Site > New Site in Dreamweaver as:

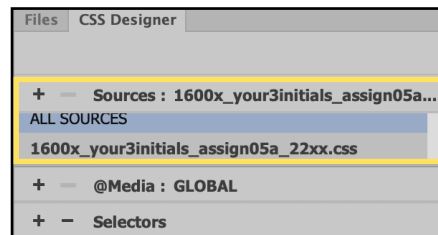

Site Name: assign05 (www)

Local Site Folder: (browse to your sub-folder labeled www)

Assignment 05A External CSS file linked to HTML file

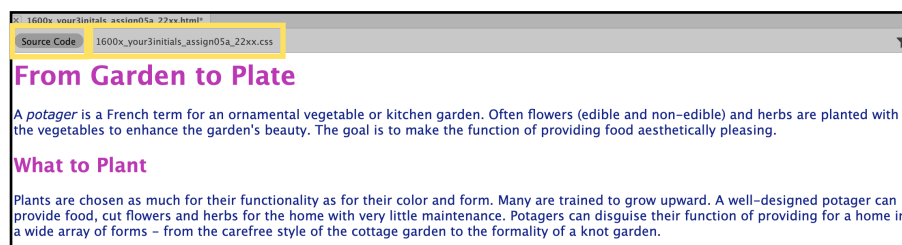

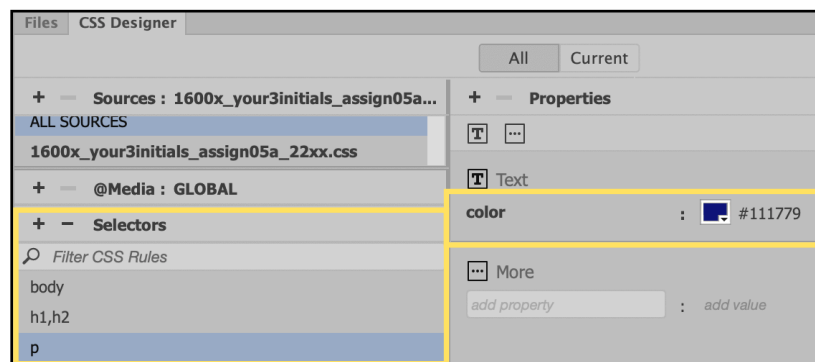

04. Open the existing file: 160xx_web_design_class_22xx >
160xx_your3initials_assign05_css_intro_22xx > www >
160xx_your3initials_assign05a_22xx.html
05. Name the Document Title as: 160xx_your3initials_assign05a_22xx
06. MyCourses > CSS Introduced.pdf how to create and design External CSS file
 - a. The html page has a <link> tag between </title> and </head> with the file name
 - b. CSS Designer panel shows .css file is linked to the webpage
 - c. Name/save the .css file/webpage as: 160xx_your3initials_assign05a_22xx.css

- d. Below @charset "UTF-8"; are css codes
- e. Apply CSS codes to match the screenshot of the finished website

HTML Element/Tag	Format
body	font-family:Lucida Grande,sans-serif
h1,h2	color:#AC1CA7
p	color:#111779

07. Organize/align and proof-check your codes within Dreamweaver (.html and .css) and in a browser

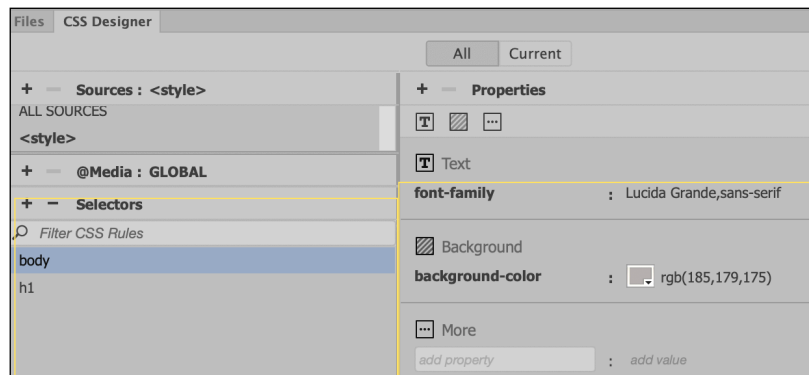

Assignment 05B Internal CSS codes inside HTML file

08. Open the existing file: 160xx_web_design_class_22xx >
160xx_your3initials_assign05_css_intro_22xx > www >
160xx_your3initials _assign05b_22xx.html
09. Name the Document Title as: 160xx_your3initials_assign05b_22xx
10. MyCourses > CSS Introduced.pdf how to create and design Internal CSS file
- After </title> add the tags: <style> </style>
(CSS codes are placed in-between the style tags)
 - Apply CSS codes to match the screenshot of the finished website

HTML Element/Tag	Format
body	font-family:Lucida Grande,sans-serif background-color:rgb(185,179,175)
h1	color:rgb(255,255,255)

11. Organize/align and proof-check your codes and in a browser

12. Zip the assignment folder and upload to MyCourses > Assignments
13. Back-up your files to Google drive or an External HD

Potatoes

There are dozens of different potato varieties. They are usually described as early, second early and maincrop potatoes.
